

CAMPBELL HARRIS

SCIENCE A-LEVEL TUITION/EXAMS For External Candidates

CHEMISTRY

Practical endorsements for new specification Science A-level qualifications are optional – however, it is worth noting that universities will not accept students without endorsements on to science-based courses.

A full Chemistry A-level consists of three written units and 12 practical assessments. Candidates registering for a Practical Endorsement Course with Campbell Harris will be required to sit all additional components for that qualification with Campbell Harris.

Students are expected to have covered the syllabus in advance of beginning the Practical Endorsement Course.

Although there is no endorsement for the AS qualification, the specification assumes candidates will have completed the first six tasks during the first year of their course and questions in the AS papers are set accordingly. For this reason, Campbell Harris will offer an AS Practical Skills course allowing students to complete the first six tasks.

AUTUMN TERM: September-December (3 hours per week)

SPRING TERM: January-May (3 hours per week)

EASTER: 9th-13th April (5 consecutive days)

Option	Tuition	Written Exams	Practical Endorsement course	Total
AS Exams	-	£175	£600 (no endorsement)	£675
A-Level Exams	-	£350	£1200	£1550
AS Evening Tuition + Exams	£600	£175	£600	£775
A-Level Evening Tuition + Exams	£1080	£300 (discounted from £350)	£1000 (discounted from £1200)	£2380

****CAMPBELL HARRIS PRACTICAL ENDORSEMENT COURSES FOLLOW AQA SPECIFICATIONS****

Candidates sitting with Edexcel, OCR or WJEC will be able to enrol on the Campbell Harris Practical Endorsement course as the endorsements can be transferred between boards. Candidates are advised to study the relevant exam board's Practical Handbook in addition to completing the course, as while the techniques tested are the same, the specific tasks may vary between boards.

External students sitting multiple Science A-levels are strongly advised to choose the same examining board for all Science qualifications.
